Objective

Highly motivated Data Analyst with strong analytical and problem-solving skills. Proficient in transforming data into actionable insights, creating dynamic dashboards, and driving business decisions. Seeking to leverage skills in SQL, Excel, Python, and Power BI to deliver data-driven solutions in a dynamic environment.

Education

TPCT's college of engineering Dharashiv, B-Tech in Computer Science and engineering   Jan 2021 – Jully 2024

- **SGPA:** 10/10 (Transcript)
- **Coursework:** Computer Science and engineering

Technical Skills

Data analysis & Visualization: Power BI & Excel(Advance)

Programming & Data Manipulation: Python (Pandas, NumPy, Matplotlib, Seaborn)

Database Management: SQL (MySQL, PostgreSQL), Database Query Optimization

ETL Process: Data Cleaning, Data Transformation, Data Integration

Reporting Tools: Power BI, Excel (Pivot Tables, VLOOKUP, Data Validation)

Operating System: Windows

Projects

Sales Performance Dashboard in Power BI

- Built a comprehensive dashboard to monitor sales performance, including filters, slicers, graphs, and matrix tables.
- Created custom measures such as YoY Growth, Monthly Sales Trend, and Top Performing Employees to provide actionable insights.
- Tools Used: Power BI

Supply Chain shipment pricing analysis

- This project focuses on analyzing shipment pricing data within the supply chain to identify cost-saving opportunities and optimize pricing strategies. Using historical shipment data, I performed data cleaning, exploratory analysis, and developed visualizations to uncover trends in shipping costs, delivery times, and regional variations.
- Tools Used: Power BI

Certifications

Two dimension Feb 2024 to Aug 2024
Python: GUVI Geek Networks, IITM Research Park s15g6p7JNYV24001179

Other

Languages: Fluent in English, Fluent in Marathi and Hindi.
Strengths: Leadership, Multitasking, Problem solving, Learner, TIme management, Always open for oppotunities.
